Title: POWER MODULE COMPRISING TWO SUBSTRATES AND METHOD FOR PRODUCING
THE SAME

IN THE ABSTRACT

Abstract

~~Power module having at least two substrates and a method for producing it~~

**POWER MODULE HAVING AT LEAST TWO SUBSTRATES AND A METHOD
FOR PRODUCING IT**

Abstract

~~The invention relates to a~~ power module 3 and a method for producing it. The power module 3 has a first substrate 1 having power semiconductor chips 4, and a second substrate 2 populated with signal semiconductor chips 5. The substrates 1 and 2 are oriented parallel one above the other, their placement sides 7 and 8 being arranged facing one another, and the second substrate 2, with the aid of bonding wires 9 bent in hingelike fashion, being held at a defined distance d from the first substrate 1 and being mechanically fixed in a plastic housing 18 and electrically connected.
